

A guide to using the Excel chart:

1. Please find and download the excel chart.
2. When you open the file, you will see the following pop-up. Select “enable macros”.
Selecting this will mean that all of the pre-set formulas in the spreadsheet work properly.

3. At the bottom of the screen there are 2 blue tabs that you will need to use. They are labelled “Insert scores here” and “chart”.

- First, click the “insert scores here” tab. This is where you are going to input your child’s highest score for the day. In the first column, find the date that you are inputting the scores for.

DATA ENTRY AREA

Date (m/d/y)	DAY	Timing length ("h:mm:ss" or "0.0")	Corrects	"not yets"
10/05/2020	0			
11/05/2020	1	00:01:00	15	7
12/05/2020	2	00:01:00	16	5
13/05/2020	3	00:01:00	17	6
14/05/2020	4	00:01:00	22	2
15/05/2020	5	00:01:00	25	3
16/05/2020	6			
17/05/2020	7			
18/05/2020	8			
19/05/2020	9			
20/05/2020	10			
21/05/2020	11			
22/05/2020	12			

- You should complete 1-minute timings, so for each day insert “00:01:00” into the timing length column
- You can then copy over your best score for each day into the corresponding “corrects” and “not yets” columns.

DATA ENTRY AREA

Date (m/d/y)	DAY	Timing length ("h:mm:ss" or "0.0")	Corrects	"not yets"
10/05/2020	0			
11/05/2020	1	00:01:00	15	7
12/05/2020	2	00:01:00	16	5
13/05/2020	3	00:01:00	17	6
14/05/2020	4	00:01:00	22	2
15/05/2020	5	00:01:00	25	3
16/05/2020	6			
17/05/2020	7			
18/05/2020	8			
19/05/2020	9			
20/05/2020	10			
21/05/2020	11			
22/05/2020	12			

- When you have updated your score, you can click on the "chart" tab at the bottom to see your progress. The spreadsheet will plot the data for you.

- You can start a new chart each time you move onto a different SAFMEDS pack.
