Creative Mission - Design your own creature

For this creative mission I would like you to design your own creature. You must think about where your creature is going to live - its habitat. What is your creature going to be...I'd like you to create an animal "mash-up". For example a crocodile and an elephant might become a "croc-o-phant" or a lion and a gorilla would be "li-rilla". Use your imaginations to create your own mash up! You'll need to think carefully about the features of both animals and how they use them.

If you like, you can use the template I have attached because everything you need to include is on here for you. If you would prefer to use your ICT skills on PicCollage or HWB that's fine with me - you do what works best for you. However, use the template as a guide to what details I'm expecting to see...

My Creature		
Diet What does it eat?	Name of Creature Where does it live?	Transport How does your creature move?
Predator or Prey? Will it be hunted by other animals? Can it protect itself? How can it catch its prey?		Skin or Covering What does your creature have as its skin or covering? Why?
		Transport How does it adapt to its environment?

- Name and a picture of your creature.
- Where does it live? it's habitat.
- Diet - what does it eat?
- Will it be hunted by other animals?
- How does it protect itself?
- How does it catch its prey?
- How does your creature move?
- What does your creature have as its skin or covering? Why is it like this?
- How does your creature adapt to its environment?

WILF:

- Detailed description and sentences that explain your ideas clearly.
- Neat presentation which uses visual information.
- Use real facts about your chosen animals/habitats.

I can't wait to see your mash ups! 🥰👍🥰
