

Student Instructions

🐼 🐘 🐼 Endangered Animals 🐼 🐘 🐼

For this task I would like you to research all about endangered animals.

Read the PowerPoint carefully please. There are also two websites I have included in the slides where you can find out lots more information about endangered species:

<https://www.wwf.org.uk/>

<https://www.worldwildlife.org/>

Your task is to choose an endangered species you have looked at or want to research and design an eye-catching poster to use to explain to people about endangered species and how we can help 👍 the 'what causes animals to become endangered' poster I have attached will also help you 👍

Think about...

What does your species look like?

Where can this species be found?

Why is this species endangered?

WILF:

- A bold title.
- Sentences with relevant, factual information about your animal(s) and why we must help them.
- Eye catching.
- Pictures and images.

You'll need to research your animal thoroughly. You can decide how to present your poster. You might want to handwrite it and draw pictures on paper, or if you have access to a tablet or computer you can use your ICT skills to present your work. You decide what works best for you 😊
